

S 1140 SMD-TW

Tunable White lighting luminary is used to control the color temperature (CCT) output of the light source. This lighting system allows the color temperature to be changed from 2700 Kelvin (warm white) to 6500 Kelvin (cold white) according to the area where it is used, application and needs. It can increase the comfort of the user by simulating the daylight cycle in places with little or no light during the day, increases concentration, can be used to create a relaxing atmosphere, helps the daily routine and provides ease of use thanks to the dynamic light cycle.

Product

Type	S 1140 SMD-TW
Category	Indoor Lighting
Color	Matte natural anodized

Technical Data

Light Source	Mid Power LED
Power / Luminous flux (LL)	15W / 1270 lm (4000K)
Power / Luminous flux (ML)	21W / 1800 lm (4000K)
Power / Luminous flux (HL)	29W / 2490 lm (4000K)
Color temperature	2700/6500K
Color rendering index	CRI>80
Electrical protection class	CLASS I
Voltage	220V/240V
Frequency	50/60 Hz
Luminous flux tolerance	±7%
Power consumption tolerance	±7%
LED life	L90B50 > 100.000 h

Other Information

IP protection	20
Impact protection	IK05
Dimensions (W x L x H)	55mm x 80mm x 1140mm
Optical protection	Micro Prismatic Diffuser
Body material	Aluminum Extrusion Profile
Diffuser material	Micro Prismatic Acrylic Diffuser
Working environment temperature	0...+35 °C
Performance environment temperature	25 °C

cd/klm
 C0 - C180 C90 - C270
