Miva60

Arlight’s New Product Family MIVA60

Our spotlight family, designed to prioritize both visual comfort and aesthetic harmony in your spaces, offers a comfortable and prestigious lighting experience with its low glare levels.

Thanks to its wide range of optical options, it provides the right light distribution for every application. Whether you need narrow-beam accent lighting or wide-beam, uniform general lighting... The choice is entirely yours.

The ability to adjust the luminaire’s direction takes it beyond being just a spotlight, also allowing it to be used as a wallwasher that illuminates wall surfaces evenly and softly.

With high-CRI light sources, it reveals colors in their true tones, adding a natural vibrancy to your living and working spaces.

With its long-lasting construction, high-quality materials, and modern design, this product family offers a professional and reliable solution for your lighting projects.

The new standard in comfortable, flexible, and performance-oriented lighting.

Experience the difference of light with the new MIVA60 family.
